

## Blister and Strip Machine Change parts / Spare parts.

### UNIVERSAL BATCH CODE PRINTING UNIT ASSEMBLY

We manufacture universal Batch Code Printing Units for Blister Packing Machine.

#### FEATURES :

Widely used in various pharmaceutical and packaging industries. Made by using quality grade raw material. Comprises of various features like easy installation, optimum quality, reliable performance and longer service life are some of the other important attributes of this unit. Can be custom made in various shapes and capacities as per specific requirements.

### BLISTER / STRIP CARTRIDGES

#### FEATURES :

The aluminum body cartridges (Pharma roller) are made for Blister packaging machine, FFS machines & Coding machines. The absorbing material used is POLY POROUS in various microns varying from 1 micron to 25 micron depending on requirement of customers. The absorbing capacity of this cartridge is quite high & the cartridges are hard so the impression is very precise with more clarity. Special ling treated cotton cloth knitted sleeves (covering) are used to avoid direct contact of stereo with roller. These ink cartridges are customized in size & design as per the requirement & specification of the machines. The outer diameter (OD) can be to a maximum size of 75 mm & the inner diameter can be of sizes as per machine fitting, & the length is variable till 400 mm.

### INKING FELT TUBES & PADS

#### FEATURES :

The Felt tubes are made from VIRGIN Australian wool of various densities from 0.35 to 0.60 depending on the requirement of customers. The Tubes / Cartridge of other sizes can also be manufactured against order. Side Rings can be provided to Felt Tubes as per requirements. We also manufacture Felt Pads & tips in various thicknesses as per customer design.
